

"Picturing the Museum: Education and Exhibition at the American Museum of Natural History"

Date : October 28, 2008

I just stumbled upon this website, created by the research library in the American Museum of Natural History and had to post a link - a selection of historical images from the museum's history showing the development of the diverse displays and people making and engaging with them across time - a really great resource and a visual ethnography of the museum itself!
